

# Type 1 or OpenType Libertinus font

–

## Type 1 or OpenType

Herbert Voß

May 6, 2020

### **Abstract**

The font family Libertinus is derived from the Linux Libertine and enhanced with a math font.

## **1 Meaning**

The package `libertinus` is only a wrapper for the other two packages `libertinus-type1` and `libertinus-otf`. Depending to the used  $\TeX$ -engine one of these packages is loaded. All optional arguments are passed to `libertinus-type1` if `pdf $\LaTeX$`  is used or passed to `libertinus-otf` if `x $\LaTeX$`  or `lua $\LaTeX$`  are used.
